The world is now facing challenges from resources, energy and environment. Sustainable development of steel industry becomes the common concern of whole society. Therefore, the theme of this conference is defined as Rolling the future: Process, Products, and Environment. Under the concept of global action, participants will discuss clean rolling, life cycle optimization of steel products and other critical issues on steel rolling. We believe the 10th ICSR will promote a further development of the global steel rolling technology. Under the situation of international financial crisis, the conference still received more than 500 papers from 21 countries thanks to the keen effort from the authors and relevant international institutions. Through careful checking and revising, 275 papers were selected into the Proceedings by a group of Chinese experts in technical committee of the conference. Contents: Part I: Plenary Sessions1.
