Reviews

This pdf is indeed gripping and interesting. It is definitely simplistic but shocks within the 50 percent of your book. Once you begin to read the book, it is extremely difficult to leave it before concluding.

As an introduction to this section a brief description and discussion of the methods used for grading pig iron may be of service. Pig iron may be classified from several points of view. According to the furnace practice it is cold, warm or hot blast iron. On the basis of the fuel used in its manufacture it is coke, anthracite, or charcoal pig. According to the method of casting it is sand, chill or machine cast, Finally, according to its chemical composition it is basic, Bessemer, malleable, foundry or forge iron. To completely describe any given brand we must classify it in all four ways; thus for example, we might say of a certain iron that it was hot blast, coke chilled, basic. The terms used in the first three classifications hardly need definition since they are self-explanatory. With regard to the und. is abbreviated from under and sug. from suggested. last it may be well for the sake of...
