

Mathematical Treatise; Containing I. the Theory of Analytical Functions, II. Spherical Trigonometry, with Practical and Nautical Astronomy

Filesize: 2.2 MB

Reviews

This is the finest book i have got go through right up until now. I have got read and i also am confident that i am going to planning to read once again yet again in the future. You will not truly feel monotony at at any time of the time (that's what catalogs are for about if you check with me).
(Taylor Medhurst)

MATHEMATICAL TREATISE; CONTAINING I. THE THEORY OF ANALYTICAL FUNCTIONS, II. SPHERICAL TRIGONOMETRY, WITH PRACTICAL AND NAUTICAL ASTRONOMY

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1838 Excerpt: $\cos. 10a + \cos. 12a + \cos. 14a = y$. And their product by 27 will be found to be, $4S = xy$, therefore $xy = \frac{4S}{x}$. Thus, $x + y = \frac{4S}{x}$, and $xy = \frac{4S}{x}$. Hence both x and y may be determined geometrically. Again, let x be divided as follows, viz.: $\cos. 2a + \cos. 8a = v$. $\cos. 4a + \cos. 16a = z$. And their product will be found in the same manner to be $S = vz$, therefore $vz = \frac{S}{x}$. Also, dividing y as follows, viz.: $\cos. 6a + \cos. 10a = v$. $\cos. 12a + \cos. 14a = z$. The product of these will likewise be $S = tv$, therefore $v = \frac{S}{t}$. Hence, v , z , and vz may all be determined geometrically. Lastly, because $\cos. 4a + \cos. 16a = z$, and $\cos. 4a \cos. 16a = \frac{1}{2}(\cos. 12a + \cos. 20a) = \frac{1}{2}z$. $\cos. 16a$, or (which is the same) $\cos. a$ may likewise be determined. Hence this simple geometrical construction: Let C (fig. 2.) be the centre of the circle, and ACD a diameter. Make AJB perpendicular to AC , and equal to AC . Draw DBF , on which take BE, BF , each equal to BA . Make EH, FG each perpendicular to DB , and equal to AC . Bisect DE in I , and make $IK=EB$. Join IH, KG , on DB , take $IM=IH$, and on KG , $KO = KF$. Divide DM in N , so that the rectangle $DNM = FG, GO$. To do this, erect the perpendiculars MT and DS equal to AC and GO ,...
